

AAM COMPETITION **BEAT THE HEAT**

AAM Competition Oil Cooler Systems

AAM Competition proudly presents the all-new S-Line and R-Line Oil Cooler Systems for the Nissan 370Z! These systems have been specifically engineered to ensure your Z stays at peak performance, keeping your oil temperatures in-check even when pushing the limits. Crafted with only the highest quality components, these oil cooler kits come complete with everything you need to get up and running!

Cooler is Better

Performance enthusiasts know the importance of keeping their oil temperatures down. Not only does cool oil allow your motor to perform better and more consistent under demanding driving conditions, but it can also prevent serious engine damage, and improve engine longevity. Protect what powers you while gaining an advantage over the competition!

STOCK

If your vehicle is just a daily driver that never sees more than 50% throttle or over 4000rpm an oil cooler may not be necessary. But if you like to push your 370Z from time to time you may want to consider one of our upgrades.

AAMC S-LINE OIL COOLER

With proven oil temperature reductions of 15-30 degrees Fahrenheit, the AAM Competition 370Z S-Line Oil Cooler is a must-have for performance enthusiasts.

AAMC R-LINE OIL COOLING SYSTEM

The R-Line Oil Cooling System is proven to drop oil temperatures by an astonishing 40-90 degrees Fahrenheit! Whether you're on the street or track the AAM Competition R-Line Oil Cooling System has you covered.

Fully Terminated Braided Lines

40-90 °F

Thermostat

Oil to Water Core

Fully Terminated Braided Lines

S-LINE

R-LINE

AAM Competition 370Z S-Line Oil Cooler Kit

The AAM Competition S-Line 370Z Oil Cooler Kit is a direct fit upgrade specifically designed to keep your oil temperature in-check under demanding driving conditions. The 370Z runs very hot oil temperatures from the factory during spirited driving. This can lead to accelerated oil break down and premature engine wear. With proven oil temperature reductions of 15-30 degrees Fahrenheit, the S-Line Oil Cooler is a must-have for any performance enthusiast. This kit contains everything you need to get up and running, including installation hardware and fully terminated braided lines.

AAM Competition 370Z R-Line Oil Cooling System

The AAM Competition R-Line Oil Cooling System is the best, most effective oil cooling system for the 370Z. Designed to ensure peak performance under the most extreme driving conditions, the extremely efficient Oil to Water cooling core effectively reduces the overall engine temperature greatly aiding engine reliability. The AAM Competition R-Line Oil Cooling System is proven to drop oil temperatures by an astonishing 40-90 degrees Fahrenheit! All other aftermarket oil coolers available for the 370Z use an air-to-air cooling core which is mounted in front of the radiator in the front bumper fascia, blocking air flow to the radiator. The AAM Competition R-Line Oil Cooling system does not block airflow to the radiator as it is mounted out of the way. This also makes it perfect for forced induction (turbocharged/supercharged) applications as it does not mount in the way of the intercooler. Whether you're on the street or at the track, the AAM Competition R-Line Oil Cooling System has you covered.
