

# TEMPERATURE JUMP

## AAM Competition Oil Cooler Systems

AAM Competition proudly presents the all-new S-Line and R-Line Oil Cooler Systems for the Nissan GT-R. These systems have been specifically engineered to ensure your GT-R stays at peak performance, keeping your oil temperatures in-check even when pushing the limits. Crafted with the highest quality components, these oil cooler kits come complete with everything you need to get up and running.

### Cooler is Better

Performance enthusiasts know the importance of keeping their oil temperatures down. Not only does cool oil allow your motor to perform better and more consistent under demanding driving conditions, but it can also prevent serious engine damage, and extend the life of your engine. Protect what powers you while gaining an advantage over the competition!

### STOCK

If your vehicle is just a daily driver an upgraded oil cooler may not be necessary. But if you are rebuilding your engine or just like to push your GT-R to the limits you may want to consider one of our upgrades.

### AAMC S-LINE OIL COOLER

With proven oil temperature reductions of 10-15 degrees Fahrenheit, the AAM Competition GT-R S-Line Oil Cooler is the perfect OEM replacement when rebuilding your engine.

### AAMC R-LINE OIL COOLING SYSTEM

The R-Line Oil Cooler is proven to drop oil temperatures by an astonishing 50-90 degrees Fahrenheit! Whether you're on the street or track it has you covered.

## S-LINE

### AAM Competition GT-R S-Line Oil Cooler Kit

The AAM Competition S-Line GT-R Oil Cooler Kit is specifically designed to keep your oil temperature in check under demanding driving conditions. The larger 33 row Setrab core mounts in the factory oil cooler location, making it a perfect upgrade option for those in search of a direct-fit replacement. The S-Line Oil Cooler Kit also serves as a cost effective solution when replacing the expensive factory cooler. With proven oil temperature reductions of 5 – 15 degrees Fahrenheit, the S-Line Oil Cooler is a must-have for performance enthusiasts. This kit contains everything you need to get up and running, including the necessary mounting brackets, installation hardware, and fully terminated braided lines.

## R-LINE

### AAM Competition GT-R R-Line Oil Cooling System

The AAM Competition R-Line Oil Cooling System is designed to ensure peak performance under extreme driving conditions. Designed to work in tandem with the factory (OEM) GT-R oil cooler, the AAM Competition R-Line Oil Cooling System is proven to drop oil temperatures by an astonishing 50-90 degrees Fahrenheit with its highly efficient Oil to Water cooling core. This incredible reduction in temperature greatly increases the overall efficiency of the GT-R's cooling system, resulting in lower engine temperatures and lower transmission temperatures. Engineered for GT-R owners who want the best performance possible while pushing their car to the limit, the AAM Competition R-Line Oil Cooling System is the most advanced and effective GT-R engine cooling option available.
